

½ Credit

Semester

10,11,12

In this course students will review and use knowledge gained in 3D modeling I to further their understanding of drafting and how it relates to manufacturing and industry. Three-dimensional CAD will be the primary means of producing drawings in this course. This course is beneficial for students preparing for careers in Mechanical Design, Tool and Die or Engineering, to name a few.

***Prerequisites:*** 3D Modeling I “C” average or instructors approval.
