

Architectural Design II

½ Credit

Semester

11,12

This course is designed to further the students understanding of how a complete set of house plans is developed and put to use. Sections are discussed in depth and drawings created. The students will also use ArchiCAD to create a full set of plans for a project. The second half of the semester, the students will do a group design problem involving data collection, evaluation, and presentation of the solution in commercial architecture.

Prerequisite: Grade of a “C” or better in *Architectural Design I*
