

Graphics III

½ Credit

Semester

11,12

This course is designed to simulate a job-like setting. Students will choose printing projects that are interesting and challenging to them, on an individual basis. Each student will also do some printing for the school district or an outside organization to gain experience in various tasks that are similar to those required in a printing business. There is heavy emphasis on quality lab work, attitude, and effort. Field trips to industry will help students gain awareness of career opportunities. A materials fee is charged.

Prerequisite: *Graphics II and instructor approval*
