

In an effort to improve the district's curriculum and instruction, increase student engagement in learning and student achievement, the curriculum and instruction program team shall:

1. Monitor the components of the sequential curriculum plan;
2. Consider using out of district consultants to assist in the evaluation process;
3. Critically evaluate current practice;
4. Identify curriculum strengths and weaknesses;
5. Update curriculum documents, instructional materials, instructional methods and local assessments;
6. Review any changes in law affecting the course/subject;
7. Analyze standardized test results and other school data; and

When requested, develop a report of the committee findings and recommendations and, as requested, present the report to the board curriculum committee.
