

751.5 TRANSPORTING STUDENTS BY PRIVATE VEHICLE

The School Board recognizes that at times there may be the need for district employees and other persons serving in an official capacity to transport students on school business. Staff members must determine that transportation by a District provided vehicle is either not available or feasible before transporting students by private vehicle. When a district-provided vehicle is not available, the building principal or designee may approve the transportation of district students by private vehicle for school business. Requests for such transportation must be made in advance and meet the criteria stated in Policy 751.5 Rule.

Approved by the Board of Education on May 18, 2009
